

AKRAPOVIČ

SLIP-ON RACE LINE (S-PO/TI/14)

for 911 Carrera (992) with non-sport exhaust

INSTALLATION RECOMMENDATIONS

PORSCHE 911 CARRERA (992) NON-SPORT EXHAUST LOOK

If Porsche Carrera 911 (992) has one of the following stock tail-pipe design options and you want to fit Akrapovic Race Slip-On Line (Titanium) exhaust on such car than follow the recommendations written bellow.

Akrapovic Race Slip-On Line (Titanium) exhaust was originally developed as replacement for sport stock Porsche 911 Carrera (992) exhaust.

1. 911 Carrera/Carrera4 default tail pipe (trapeze)

2. 911 Carrera/Carrera4 with Sport design/Aero Kit* and default tail pipe (trapeze)

3. 911 Carrera/Carrera4 with sport tail pipes (double round)

4. 911 Carrera/Carrera4 with Sport design/Aero Kit* with sport tail pipes (double round)

5. 911 Carrera S/4S default tail pipe (double round)

6. 911 Carrera S/4S with Sport design/Aero Kit* with default tail pipe (double round)

As Akrapovic exhaust replaces Porsche sport exhaust it is only possible to install Akrapovic exhaust on cars that have the same bumper and diffuser as the ones with Porsche sport exhaust.

* **Sport design/Aero Kit:** different rear apron (diffuser) in distinctive design

The cars with Sport Porsche exhaust look like this:

1. 911 Carrera (all models) with Sport Porsche exhaust

2. 911 Carrera (all models) with Sport design/Aero Kit with sport exhaust

According to one of the options the car has to be modified from the picture on the left to the one on the right to be able to instal Akrapovic Slip-On Race Line (Titanium). To do so some stock parts from Porsche have to be bought.

911 Carrera basic- without Sport design/Aero Kit

License plate position-> in the diffuser

Following Porsche part numbers have to be ordered according to the region where the car is located as different regions use different license plate dimensions and as a consequence different diffuser part numbers.

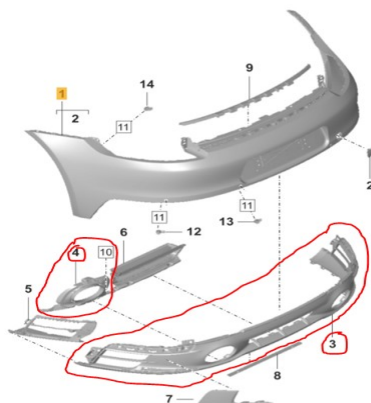

Be aware that the mentioned part numbers are given only as guidance/reference and have to be checked with local Porsche delaeurs/specialists before ordering. Akrapovic is not taking any responsibility in case the suggested part numbers will not fit on the car.

Porsche Diffuser (part number 3 on the schematic bellow)

ECE: 992 807 983A
USA: 992 807 983B
JPN: 992 898 014Q
CHINA: 992 898 014N

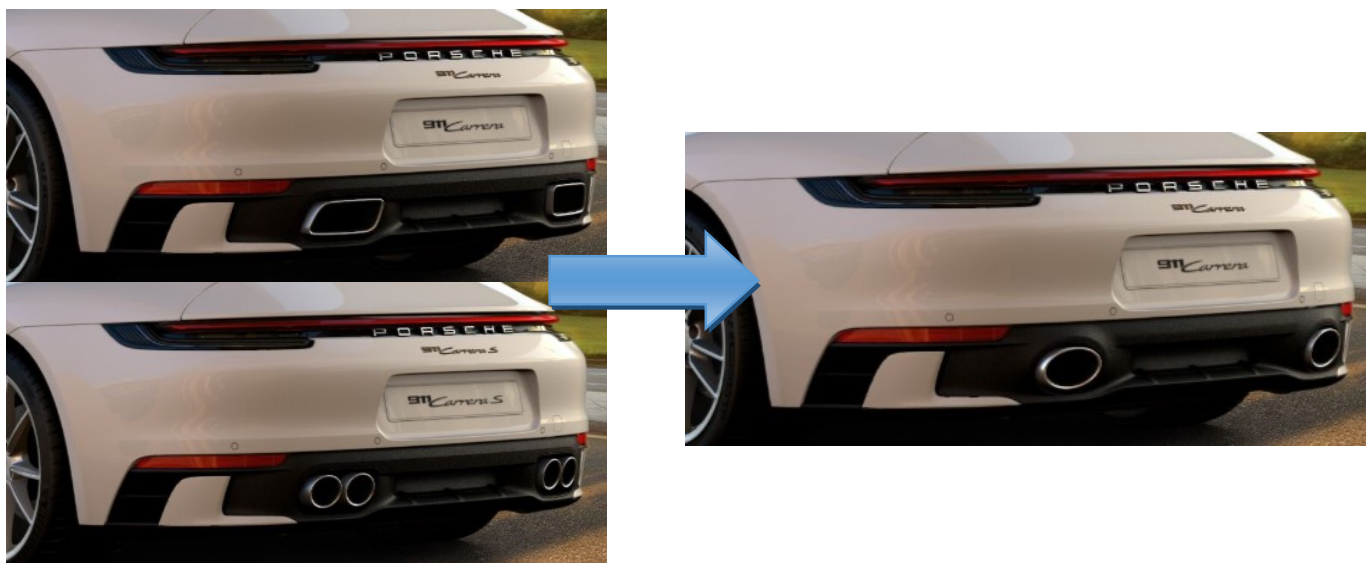

Porsche Oval Tail pipe bracket Left: 992 807 833A

Porsche Oval Tail pipe bracket Rifgt: 992 807 834A (part number 4 on the schematic bellow)

911 Carrera with Sport design/Aero Kit

License plate position-> on the bumper

Porsche Diffuser 992 898 014 AN (same part number worldwide)

Porsche Oval Tail pipe bracket Left: 992 807 833C

Porsche Oval Tail pipe bracket Right: 992 807 834C

For installation of mentioned parts follow the installation instructions of Akrapovic Slip-On Race Line (Titanium) S-PO/TI/14 which can be found on this [LINK](#).
